

## Introducing the Bring Old Devices Tour - a chance to learn about transforming old kit into new

You're invited to the **Bring Your Old Devices Tour**, a series of afternoon events for school leaders who are interested in learning more about Neverware's CloudReady OS, a new technology that transforms old kit into Chrome machines.

Given current budgetary pressures and compliance demands, it's more important than ever to find practical solutions that increase secure, affordable access to technology in schools. We hope you can join us to learn more about how CloudReady addresses these challenges.

[REGISTER HERE](#)

Delegates are invited to bring **up to 5 PCs, Macs, or Netbooks per school** to be transformed into CloudReady devices. These devices can be up to a decade old. During the event's session, specialists will 'flash' the machines and return them at the end of the event.

We hope you can join us at our event in Norwich:

**Date:** 5 July 2018

**Time:** 13:00 - 16:00

**Venue:** Carrow Rd, Norwich NR1 1JE

For more information or to register to attend this Bring Your Old Device event, please visit the event [webpage](#) or email [kcommon@google.com](mailto:kcommon@google.com).

We hope to see you there!
