

Raising Attainment in Mathematics

Understand what is expected in the KS2 Mathematics NCTs and what to do to meet these expectations, through a sustainable approach to raising attainment in mathematics for your Year 6 cohort.

Course Outline

With so many objectives in the KS2 curriculum and the expectation it will all be assessed, it's tricky to decide which to focus on and the best actions to take to secure better outcomes for children.

This tried and tested approach will help you identify key issues in your school, support you to create effective tailored planning and provide access to subject specialists who will share successful teaching strategies. You will leave the programme not only having made short term impact, but with a sustainable model and a suite of strategies to ensure continued school improvement in mathematics.

By the end of the course participants will:-

- be provided with a detailed Question Level Analysis of the 2018 Key Stage 2 mathematics tests in addition to the STA version
- be supported to write a clear achievable action plan which will ensure their Year 6 pupils are prepared for the KS2 mathematics Tests
- receive training in the teaching of the key topics of the KS2 mathematics curriculum

This programme will require delegates to carry out in-school actions within deadlines to support their participation in the programme.

Phase

Primary

Audience

Subject Leader,
Middle Leader,
Class Teacher, NQTs,
Returners to Teaching

Trainer

Rose Keating

Dates and Times
