Course Context/Audience:

The development of a school's vision provides common direction, powerfully shapes practice and binds the school and community together for the benefit of its children. This course will enable participants to reflect upon the relevance and value of their current vision and offer practical strategies to work with the school's stakeholders to raise expectations and generate energy for change. An element of this course will incorporate a visit to a local Primary School to see vision in action as well as opportunities to identify good practice to provide self evaluation evidence.

Objectives:

By the end of the course, participants will:

- understand how to create a vision, aims and values statement for their school and will know how to map the steps necessary for this vision to be realised in everyday practice
- decide whether the vision for their school is fit for purpose
- know how to monitor and evaluate the effectiveness of the actions taken to realise the school's vision
