

# 2013

## Leading Numeracy Across the Curriculum

Norfolk Integrated Education Advisory Services  
(NIEAS)

**Audience:** secondary school Senior Leaders  
and Subject Leaders of mathematics

**Context:**

The Ofsted inspection framework emphasises achievement in, and the teaching of, mathematics. The most effective route to excellent standards in mathematics is to ensure that skills taught in maths lessons are developed, consolidated and enhanced right across the curriculum.

This half-day course will consider how best to lead and develop numeracy / mathematics across the secondary school.

**Objectives:**

- To support delegates in producing an action plan to improve numeracy across the school.
- To identify and explore the mathematical concepts which are part of the wider curriculum.
- To consider the methodology and terminology that teachers use to develop numeracy.
- To provide practical, exciting lesson ideas which develop mathematical understanding and encourage the application of key numeracy skills in different subjects.

*It would be beneficial to bring along your school's numeracy policy and/or handbook.*

**Course code:** EPMW1 A

**Course date:** 28<sup>th</sup> January 2013

1.30 pm – 4.30 pm

Norwich Professional Development Centre

**Course Fees:** Norfolk LA Schools - £92.00

External Clients (including academies) - £102
