

2013

Preparing to deliver the new programme of study for science at KS1 and KS2

Norfolk Integrated Education Advisory Services
(NIEAS)

Teaching the biological aspects of the KS1 and KS2 new science programmes of study

12th & 13th July 2013

Holt Hall

EPGD1

Delegates will look in detail at the biological areas of the new programme of study for KS1 and KS2. They will consider and try a range of practical activities that can be used to deliver the working scientifically requirements and will have the opportunity to develop their own subject knowledge.

Teaching the materials aspects of the KS1 and KS2 science new programmes of study

11th & 12th October 2013

Holt Hall

EPGD2

Delegates will look in detail at the materials areas of the new programme of study for KS1 and KS2. They will consider and try a range of practical activities that can be used to deliver the working scientifically requirements and will have the opportunity to develop their own subject knowledge.

Teaching the physical science aspects of the KS1 and KS2 science new programmes of study

28th February & 1st March 2014

Holt Hall

EPGD3

Delegates will look in detail at the physical science areas of the new programme of study for KS1 and KS2. They will consider and try a range of practical activities that can be used to deliver the working scientifically requirements and will have the opportunity to develop their own subject knowledge.

Participants on each course will have an opportunity to examine how their current scheme of work can be adapted to accommodate the new requirements. They will have ample opportunity to reflect and discuss the curriculum and planning implications.

Each course runs from Friday lunchtime to Saturday lunchtime and includes dinner and an overnight stay at Holt Hall. £200 per delegate per course
