OUTSTANDING PHYSICAL EDUCATION

A DVD Resource for
teachers & schools

In order to help teachers to plan, deliver and assess high quality physical education we have worked with colleagues in schools to produce this DVD resource.

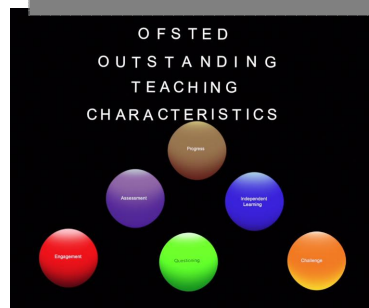

It is a tool to help teachers, middle leaders and heads discuss, develop and achieve high quality teaching and learning in their schools.

So what is an Outstanding Lesson?

Putting this simply we believe that it is a combination of the following key ingredients:

- Engagement
- Challenge
- Questioning
- Independent Learning
- Assessment
- Progress

This DVD explores these characteristics together with the 12 guiding principles for learners to be successful in PE using clips from lessons, staff talking and guidance. Resources and notes will support colleagues to develop high quality PE.

To be launched at this years
PE Conference
19 November 2013
Are **YOU** there?
