

Sexting and Pornography; Meeting the challenge through effective SRE

Course Aims:

- Recognise and understand the influence of media and pornography on children and young people.
- Consider how to improve the teaching of age appropriate SRE to promote healthy relationships in light of Ofsted's recent review.
- Examine teaching strategies and schemes of work that empower young people to make healthy decisions, challenge peer pressure and rebuff commercialisation and sexualisation.
- Clarify the law and child protection issues relating to sexting and pornography.

"The failure to include discussion of pornography is concerning as research shows that children as young as nine are increasingly accessing pornographic internet sites."

Ofsted, Not Yet Good Enough; PSHE 2013
