Norfolk Music Service

Using iPads In Primary Music Lessons

Norfolk Music Service

Objectives:

1. Introduce teachers to some great music apps that will help them improve their music instruction.
2. Show how music apps can be used in conjunction with and compliment the curriculum.
3. Demonstrate the effective use of iPads in a classroom setting.
4. Using iPads alongside traditional instruments to create and improve the quality of practical music sessions.

Course participants can bring their own iPads or try out the apps on the iPads that are available on the day.

The course is for all head teachers, teachers and teaching assistants who are interested in integrating iPads in to their music sessions.

You do not need an in-depth musical knowledge or the ability to read music just an enthusiastic belief that by utilising modern technology we can improve the musical skills and enjoyment of our students, whether they are main stream or have additional needs.

Date and Time:	26/01/15 9am – 12 noon
