## Step On Tutor Training

### Norfolk Integrated Education Advisory Services (NIEAS)

#### Content:

Following requests and trials within Hertfordshire, Norfolk Steps is offering a 3 day 'Step On Tutors' Course for staff with existing Norfolk Steps practitioner experience. The course is aimed at those who would like to become an in house tutor to deliver 'Step On' training or better support their service with implementing Step On.

This course will not extend as far as the full 'Norfolk Steps Tutor' certification and will not include Restrictive Physical Interventions included within 'Step Up'

The course will be school or service specific which will allow the participant to deliver training within their own school or setting, within agreed ratios.

The tutor course is an assessed course and attendance does not guarantee full accreditation.

#### Important Information:

As this is a tutors course tutors should consider their confidence to stand and deliver training as this will be an expectation within the course. As the course includes low level physical activities participants should consider their willingness and ability to deliver these physical skills.

Once trained, 'Step On Tutors' can train up to 12 staff on their own or groups of between 12 and 24 delegates with 2 tutors.

Lunch and refreshments will be provided.
