

Eco Schoolwear

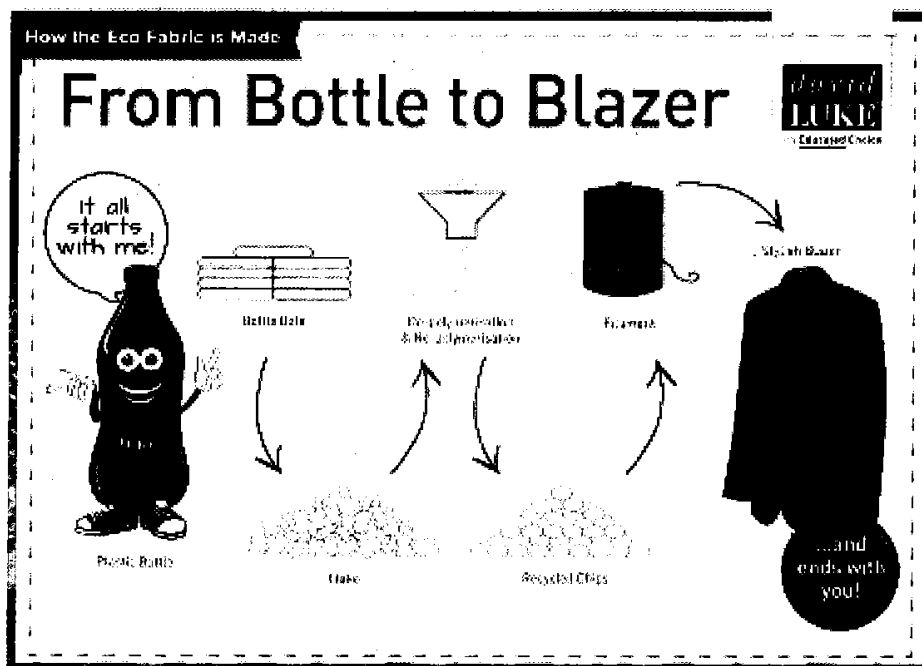

Inspired by the Eco Schools initiative, part of Keep Britain Tidy, and drawing upon our experience in textiles, Cotton World has established a new business focused on supplying Eco schoolwear direct to schools and academies.

As a Norfolk based business and an active member of the national Schoolwear Association, we are committed to making Eco schoolwear accessible and affordable to parents.

Eco schoolwear is a tangible example to students of how recycling works to create products, and we believe that the uniform itself can become an educational tool promoting a more sustainable future for the next generation.

We are working closely with leading UK garment manufacturer, David Luke, to offer blazers and jackets constructed from 100% post-consumer Recycled Polyester, which have received Intertek Green Leaf certification. Additionally, we are able to offer Eco trousers, skirts, shorts, polo shirts and sweatshirts.

In line with recommendations that schools should have more than one uniform supplier, Cotton World is pleased to work alongside existing suppliers to provide Eco schoolwear.
