

## **0-19 Healthy Child Programme - School Profiling Focus Group**

Hosted by Iceni Healthcare Limited in conjunction with Cambridgeshire Community Services NHS Trust  
as part of the 0-19 Healthy Child Programme in Norfolk

Friday 18th March at 1:30pm

Keswick Suite, Park Farm Hotel, Hethersett, Norwich, NR9 3DL

### **Question: If you could have access to an Outline Health Profile of your school population, what would it help you to know?**

#### **What is a School Profile?**

A School Profile is a report created from health data relating to a school population, presented in an aggregated non-identifiable format

#### **What is it for?**

The profile can be used as a resource to provide information and insight about health and social factors affecting your school population, to assist with

- Guidance on the training required for staff members to help them support the health needs of the school population
- Providing insight into health issues affecting your school population to inform potential educational initiatives relating to health matters

#### **What information?**

This might include information on the incidence of allergies, certain health conditions, ongoing medication or health related social factors in the school population

#### **What it is NOT for**

It is NOT to identify health issues or factors affecting individual pupils - any information that could lead to identification by association would automatically be excluded

#### **What is the purpose of this Focus Group?**

The purpose of this Focus Group is to get a stronger idea of what data or information should be available in a school profile - What factors are you interested in? How would you like the report to appear?

**If you are interested in attending please contact Iceni Healthcare,  
either via email at [wmumford@icenihi.co.uk](mailto:wmumford@icenihi.co.uk)  
or telephone on 01953 609704**
