# Mathematics Toolkit: calculation strategies

Developing conceptual understanding of  
written calculation strategies.

Delegates will:

- ensure a secure knowledge of place value
- encounter a range of models, images and resources to use in the classroom which give pupils the opportunity to develop their understanding of place value and calculation strategies
- be offered guidance on the teaching and learning of mental and written calculations
- develop a clear understanding of the progression of calculation skills in each of the four operations.

This course can be delivered in clusters or  
to individual schools as two twilights.
