

Summer Seasonal Specials

Available July 4th – July 15th only (max 40 children)

Dairy Days

Watch some of our dairy herd being milked!

The dairy day will focus on the dairy, rather than the farm as a whole. We will visit the dairy in the morning, have a chance to see some milking, and gain an understanding of the dairy – and of course, visit our calves! In the afternoon we will have dairy / cattle related activities in the schools barn – tailored to the age of the group

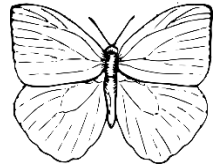

This is a very rare opportunity, to see the college dairy while it is running!

We have very limited availability for these days
(a total of just 4 dates are being offered)

Planned timings for visit 09.45 – 14.15

Habitat Days

Visit the farm and campus grounds

On habitat days we plan to have a shortened farm visit, looking at the farm from a habitats perspective, and also spotting where wild animals have made the farm area their home.

In the afternoon we will enjoy habitat activities such as pond dipping and mini-beast hunting

We may also build simple bug hotels for you to take back to school!

Habitat days are being re-introduced to the college visit program, after being absent for a number of years – book soon to avoid disappointment!

Planned timings for visit 09.45 – 14.15
