

Teaching Computing: Assessment, Progression and Activities at KS1 and KS2

This course will look at the progression and assessment of skills and knowledge in computing and develop staff confidence in teaching the subject.

Course Outline

Use practical activities to highlight different strategies in teaching key concepts in computing. Look at freely available resources and materials for teaching computing and discuss the progression and assessment of skills using practical examples.

By the end of the course participants will:-

- develop your understanding of the national curriculum requirements of Computing
- develop an understanding of programming skills at Key Stage 1 and 2
- know how to use the freely available software and online resources to support the computing curriculum
- explore ways to plan, develop and assess the computing curriculum
- be able to use resources to support eSafety

Phase

Primary
