

# CLEAPSS - The Safe and Effective D&T Technician

**This one day course is designed primarily for D&T technicians working in the resistant materials area who are new to the job, but will also be of use to experienced technicians.**

## Course Outline

The course will cover essential health and safety and offer advice on the layout of the preparation area to ensure safe use of machines, safe storage of hazardous materials, methods of storing consumable materials, small components and valuable equipment. The course will also include advice and suggestions on tool storage in workshops and the establishment of maintenance and checking systems for tools and machines.

## By the end of the course participants will:-

- to provide essential knowledge for D&T workshop technicians on the operation of resistant materials preparation areas and key aspects of the work of a workshop technician.
- to provide awareness of the risk assessments and health and safety issues the influence the work of technicians
- to provide awareness of PUWER and other regulations concerning the purchase and installation of equipment and machinery.
