

Mathematics Programme: P is for Pedagogy

**Educator
Solutions** 

**“Teaching is not supposed to be easy.
It’s supposed to be worth it.”**

Course Outline

Teaching content is only a small part of what teaching is about. Teaching is about so much more. Often it isn’t so much what you do but rather how you do it.

So come and learn about the pedagogies of Goutard and Gattengo. Find out about Japanese lesson study or South East Asia pedagogy. By the end of the 6 sessions you will be able to teach like a pirate and use guerrilla teaching as part of your mathematics toolkit of pedagogical strategies. Discover what the big ideas are in mathematics, how influential mindset can be and the power of mathematical powers.

What are you waiting for?

By the end of the programme participants will:-

- be desperate to get back to their classrooms to try out the wealth of pedagogical ideas offered on how to teach mathematics in a creative, interesting and meaningful way
- feel empowered to take a few risks and try out some different pedagogical techniques in their mathematics classrooms.

Phase

Primary and Secondary

Audience

All staff

Trainers

Alison Borthwick
Anna Hogg

Dates

10/11/2016
07/12/2016
24/01/2017
16/03/2017
11/05/2017
15/06/2017

**Delegates must
attend all 6 sessions**
