

Improving Mathematics Programme for Cross Phase Teaching Assistants

Improving and developing mathematical subject expertise.

Course Outline

This programme ensures that teaching assistants, are prepared for supporting the most vulnerable learners with the fundamentals of mathematics. We focus on developing pupils' mathematical ability and confidence without having to resort to memorising procedures. A key thread to this programme is developing conceptual understanding through the concrete-pictorial-abstract (CPA) approach, a key learning principle behind the success of mathematics in Singapore.

By the end of the course participants will:-

- gain a deeper understanding of how children learn mathematics
- develop knowledge and confidence in subject expertise
- discover the concrete, pictorial, abstract (CPA) approach
- understand the progression and strategies in teaching the four operations
- be equipped with a variety of activities to use back in school.

Phase

Primary and Secondary

Audience

TAs and HLTAs

Trainer

Rose Keating

Dates

17/10/2016

14/11/2016

12/12/2016

Delegates must attend all 3 sessions

Time

09:30 - 16.00

Venue

Norwich Professional Development Centre

Cost

£500 per delegate

Course Ref

TLS-1016-T055
