

Outstanding Mathematics Programme for Primary Teachers

Are your maths lessons creative, connected and responding to children's curiosity?

Course Outline

This programme will build upon subject knowledge and develop pedagogy to teach concepts through fluency, reasoning and problem solving. Woven into the programme will be ways to ensure progress and appropriate levels of challenge for all children, ideas to challenge thinking around effective marking and feedback and up to date strategies such as the bar model to ensure that children become creative and curious mathematicians.

By the end of the course participants will see and understand how to become an outstanding teacher of mathematics through:

- exploring innovative and imaginative representations to promote deep thinking
- engaging and enriching opportunities to strengthen the application of mathematics skills
- empowering everyone to be passionate about the beauty of mathematics.

Teachers who attended programme last year have said:

"Excellent impact on the teaching at my school through these PD sessions".

"Very informative and useful day. I am taking lots away to share with colleagues".

Phase

Primary

Audience

Subject Leaders,
Class Teacher,
NQT

Trainer
