

# Raising Attainment in Mathematics at KS2 Programme: Leading change and securing impact in your school

## What you need to know to raise standards in mathematics!

### Course Outline

This is an exciting training programme which combines both a taught PD element and gap tasks within it to maximise impact in school. Subject and pedagogical knowledge will be explored, alongside the sharing of good practice between schools and the opportunity to develop new 'out of cluster' collaboration. Case studies will be one of the mechanisms used to celebrate and share good practice among those schools participating. This programme will enable schools to raise attainment in mathematics.

### By the end of the course participants will

- explore how to create effective sustainable improvement in key areas of mathematics
- discover how to get better at learning in mathematics
- develop new 'out of cluster' collaboration to share good practice.

### Phase

Primary

### Audience

Headteacher,  
Deputy Headteacher,  
Class Teacher, NQT

### Trainer

Alison Borthwick

### Dates and Times

01/11/2016

17/11/2016

08/12/2016

*From 09.30 to 16:30*

10/01/2017

*From 13:30 to 16:30*

*Delegates must attend  
all 4 training days*

### Venue

Norwich Professional  
Development Centre

### Cost

£495 per delegate

### Course Ref

TLS-1116-T041
