

# Free support and resources for year 5 and 6 primary science from BBC *TERRIFIC SCIENTIFIC*

There's still time to sign up for the BBC's *TERRIFIC SCIENTIFIC*. Aimed at **9-11 year olds**, there are free resources, lesson plans, classroom investigations and an online map to share your results with other schools around the UK. *TERRIFIC SCIENTIFIC* will run until summer 2018 with a fresh series of investigations, fantastic resources and Live Lessons for the next academic year.

5,000 primary schools have registered already and have enjoyed it so far:

"Lovely resources"  
"We were really inspired and think that science is fun"  
"It makes science really exciting for everyone"  
"Fantastic time taking part"  
"Can't wait for the next one"  
"Our class absolutely LOVED this experiment"

If you are already taking part, do let *TERRIFIC SCIENTIFIC* have your data from the **Time** investigation asap (closes on 21<sup>st</sup> April) so that it will be displayed on our [interactive map](#).

And if you haven't signed up yet, **you can still register and join in**. The next *TERRIFIC SCIENTIFIC* investigation – **Trees** (Living things and their habitats) – starts after the Easter break (on Monday 24<sup>th</sup> April) and runs until 4<sup>th</sup> June. The primary school scientists will be taking part in a UK wide survey of trees in school grounds, looking at the species, size and carbon value of each tree and how important they are to their world.

Want to get involved? [Register here](#) if your school hasn't already. It's easy and only takes a few minutes.
