

# NQT Toolkit: Getting to Grips with Teaching

**Get inspired, get ideas and upskill yourself in the teaching of English by getting to grips with the core knowledge and skills needed to teach English well.**

For NQTs and anyone who needs to develop their skills in teaching English, this two day course takes delegates supportively through the process of planning an engaging teaching sequence and explores the key teaching strategies needed to teach English well. With an emphasis on quality texts, delegates will experience planning a teaching sequence designed to inspire, build upon and develop children's skills and with clear outcomes in mind. They will have the opportunity to try their hand at a whole range of fun, practical and transferable activities as well as develop their own skills in key teaching strategies such as shared and guided reading and writing.

**Delegates will be asked to complete a task in between sessions.**

**By the end of the course participants will:-**

- know how to construct outcome led and exciting teaching sequences informed by the National Curriculum
- be able to use texts to support and inspire
- be familiar with the features of effective shared and guided reading and writing
- be aware of the importance of talk
- leave with practical ideas to challenge and engage children to take back to the classroom.
