

PIVATS: Performance Indicators for Valued Assessment and Targeted Learning

PIVATS will demonstrate improved outcomes for individuals through quality assessment.

Course Outline

PIVATS is an assessment system for pupils working below age related expectations. The use of PIVATS enables progress to be shown for such pupils and will allow for consistently high expectations of what each pupil can achieve based on clear identification of what pupils already know, understand and can do.

During this programme of 2 sessions, delegates will develop learner profiles to become familiar with the tool. As a result, by the end of the programme delegates will have a detailed overview of PIVATS, a working knowledge of the tool and have an active case to demonstrate quality driven pupil progress.

By the end of the course participants will:

- Have developed a detailed overview of the PIVATS tool and how to use it
- Be able to facilitate collective working for accurate and appropriate baselining of pupils as a springboard for targeted teaching and learning
- Be able to demonstrate value-added progress for pupils not attaining, achieving or progressing at national expectations, specifically those operating well below.
- Will have one or more active real time case studies for focus children for whom the PIVATS system will already be implemented and that will be informing targeted teaching and learning,

Phase

All schools

Audience

High Level Teaching Assistants
Senior Leaders
Middle Leaders
Headteachers
Deputy Heads
NQTs
Classroom Teachers
Teaching Assistants
Subject Leaders
Leadership Team
SENCOs
Returners to Teaching
Supply Teachers
