

# Mathematics Toolkit: writing a scheme of work for mathematics

## **A scheme of work for £165? Yes please!**

### **Course Outline**

This workshop provides a practical opportunity to participate in the collaborative planning that is a hallmark of high-quality curriculum planning. Working as part of a group you will have the opportunity to contribute to the building of a mathematics scheme of work from Year 1 to Year 6. Guidance will be provided as to how to structure the scheme of work and on making decisions about both content and skills objectives.

Based on a minimum of 12 teachers attending, delegates will work in small groups on each year group.

At the end of the day you will be able to leave with lots of ideas as well as a long-term plan covering Y1-Y6.

### **By the end of the course delegates will:-**

- have developed a greater understanding of the essential components of a scheme of work, including long, medium and short term planning
- have participated in collaborative planning
- take away the materials that have been written during the day.

**Delegates will need to bring along a fully charged laptop and a memory stick.**

### **Phase**

Primary

### **Audience**

Middle Leaders  
Subject Leaders

### **Trainer**

Alison Borthwick

### **Date**

07/07/2017
