

Suffolk & Norfolk School Centred Initial Teacher Training

High quality teacher training in local schools

Design Technology Enhancement Courses 2017

Do you worry that your own knowledge of Resistant Materials, Product Design, Food, or Textiles isn't as strong as you would like? Would you feel out of your depth if asked to teach some aspects of D&T to Secondary pupils? Do you just need to brush up on your knowledge and understanding of key D&T concepts and topics?

Suffolk and Norfolk Initial Teacher Training offers you the opportunity to improve your D&T Subject Knowledge this summer whether you are a potential trainee, serving teacher, have a support role in school or just want to find out more about the D&T curriculum.

Each training day targets key knowledge and understanding for teaching or supporting lessons in Resistant Materials, Product Design, Food, or Textiles. The sessions will be lively, interactive, and practical with many activities and strategies that can be taken back into the classroom.

'The course leader is enthusiastic, interesting and keeps it fun!'

'We learnt a lot in a short space of time...great resources on offer.'

(Previous delegates)
