Excellence and achievement in English

As the National Curriculum states:

“Teachers should develop pupils’ spoken language, reading, writing and vocabulary as integral aspects of the teaching of every subject. English is both a subject in its own right and the medium for teaching; for pupils, understanding the language provides access to the whole curriculum. Fluency in the English language is an essential foundation for success in all subjects.”

Educator Solutions English Professional Development and Learning

We believe the key to excellence in the teaching of English lies at the intersection of three elements: secure subject knowledge, a stimulating and empowering curriculum and a clear and shared vision of success.

As the theories and practices of English are often intertwined, training products typically cover more than one of the above.

We understand that it can be challenging to prioritise specific school needs, particularly as English is a wide and varied subject. Invite us to help you identify your priorities and secure better outcomes for your pupils whether it be through centre-based, in-school training or bespoke consultancy. We also welcome the opportunity to work with and support other CPD providers of English.

We have shaped our professional learning for English to cover three strands:

English Subject Confidence

Our English subject knowledge-specific training ensures that teachers are equipped to teach the curriculum effectively and appropriately.

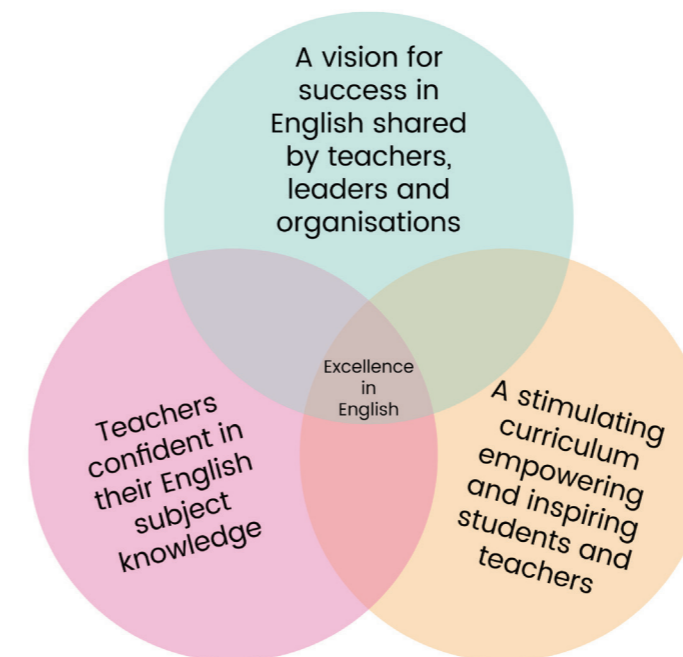

Teaching English

Our training aims to provide teachers and teaching assistants with best-practice theory and practical pedagogical support in the classroom.

Leading English

Our training and support for school leaders and English subject leaders is designed to empower them to drive and sustain effective change in their school.

Sessions can be combined to create bespoke training programmes for a school, cluster or multi academy trust.

Effective teachers of English weave many threads together to make learning memorable, engaging and effective. Our integrated approach allows all teachers, teaching assistants, leaders of English and school leaders to develop their understanding, lead change and improve pupil outcomes.

“The limits of my language are the limits of my mind. All that I know is what I have words for.”
