

# Primary Mathematics Professional Networks 2017/2018

**The Primary Mathematics Professional Networks are designed to support subject leaders who wish to work and learn together to bring about sustained improvement in mathematics in their school.**

**Our professional networks enable you to access partnerships and resources that will deliver real improvements:**

- enable schools to keep abreast of international, national and local developments
- facilitate cooperation, mutual support, the sharing of resources and best practice between schools
- help develop competent and confident leaders
- encourage debate about improvements and developments
- draw on wider expertise in development within the subject.

**Teachers who attended this network last year have said:**

*"I always go back to school enthused!  
Excellent professional development days.  
Huge growth in pedagogical confidence for me,  
impacting learning in school and driving continued  
improvements in teaching and learning.  
Gives me confidence to talk to head about current  
'thinking'.  
Helps direct my priorities!"*
