

Science for Newly Qualified Teachers

This one day course is intended for Newly Qualified Teachers who want to build their confidence and develop their expertise in this core subject.

Course Outline

This course is designed to equip Newly Qualified Teachers with the skills, knowledge and confidence to teach science through all years of the primary phase.

It is an essentially practical course with delegates taking part in hands on practical activities which can then be used in their classroom. Necessary subject knowledge is derived from reflection on these activities and investigations.

By the end of the session participants will:-

- have a clear and understanding of the Science component of the National Curriculum
- know how to use the methods of Working Scientifically in teaching the content of the Programmes of Study in science
- have experienced a range of practical investigations that can be simply used in their classroom
- have an understanding of the progression of the concepts in teaching biology, chemistry and physics
- be more confident in teaching science

Phase

Primary

Audience

NQTs,
Returners to Teaching
