

Knowing and Teaching Mathematics: Mathematics for EYFS

Developing excellence in mathematics with young learners.

Course Outline

Young children are natural mathematicians. They arrive at school being able to solve problems, reason about and connect their ideas together and explore contexts and tasks deeply. So how can we use these skills and turn them into mathematical experiences to help them to grow into young mathematicians? This training day provides both the subject knowledge and pedagogical knowledge to do this.

By the end of the day participants will:-

- develop an awareness of how to create learning
- demonstrate understanding of the key ingredients needed to develop excellence in mathematics with young learners
- explore the key subject specific content and different pedagogical approaches for mathematics in Early Years Foundation Stage.

Phase

Primary

Audience

Senior Leaders
Subject Leaders
