

Getting it right: Collaborative Writing Moderation KS1
Getting it right: Collaborative Mathematics Moderation KS1
Getting it right: Collaborative Writing Moderation KS2

Ensure your school is submitting accurate data. This is your chance to feel confident moderating tasks in a structured supportive environment.

With plenty of opportunities for discussion, delegates will benefit from the chance to compare their judgements with teachers from other schools to develop a collective understanding and consistent approach as well as take advantage of the English/Maths subject specialist, who will be at hand to answer any questions.

By the end of the course participants will:-

- experience structured and supportive moderation tasks;
- leave more confident they can accurately apply the interim teacher
