

# Science in the Environment

**A one day course that equips teachers with the skills and knowledge to teach the environmental elements of the National Curriculum.**

## Course Outline

In science education *“pupils should be encouraged to develop a sense of excitement and curiosity about natural phenomena”*  
(National Curriculum, 2014)

Learning science in the environment is a key element in meeting this aim.

This course in the beautiful surroundings of Holt Hall will explore how this may be achieved while focusing on the Biology elements of the Programme of Study.

## By the end of the course participants will:-

- know how to identify common plants and animals (including pond and land invertebrates)
- be able to teach environmental science through good working scientifically practice
- be able to teach rocks and soils through practical methods
- know how to teach aspects of physics through outdoor learning
- explore the cross curricular opportunities of environmental learning

## Phase

Primary
