

Greenpower F24 STEM initiative set to grow in Norfolk & Suffolk – employers are needed to engage with schools on exciting low-carbon racing car projects – launch event in Norwich early-evening on 9th May.

- The IET F24 challenge offers pupils aged 11-16 amazing opportunities to build & race full-scale electric cars. Most schools start with a kit from the Greenpower Trust (see greenpower.co.uk), some progress to scratch-building.
- Data from participants shows improved soft-skills; pupils solve problems, collaborate and develop resilience within a purposeful context of low-carbon innovation.
- Several thousand pupils elsewhere in the UK have competed from hundreds of secondary schools – **grants are now available to support schools in Norfolk.**
- Employer engagement is core to the project, with firms from different backgrounds in a range of sectors interacting and providing support to school teams.
- Launch event from **17.30 – 18.15 at Town Close School, Norwich, on Wednesday 9th May** – contact mbuck@townclose.com for details. Greenpower also have a stand at an Educator Solutions STEM fair at Carrow Rd. stadium on May 10th.
