

Family Practitioner Network

The Family Practitioner Network provides professional advice and information for all those working with families in a supportive and advisory capacity.

Course Outline

'Our network meetings are invaluable. It's so important for us to know about and understand the updates, find out about the new structures in Children's Services, hear from the support agencies which are still out there, get together with other family practitioners, talk through issues and share solutions. The network meetings help us feel less isolated and equip us to work effectively.'

(Participant on network)

The 6 meetings (one per half term) provide the opportunity for practitioners working directly with families to:

- receive ongoing CPD
- receive relevant and current briefings from statutory bodies, voluntary organisations and support agencies
- facilitate co-operation, mutual support, the sharing of resources and best practice.

Practitioners are also members of a virtual discussion forum, receive half termly newsletters and receive email and telephone support from a specialist adviser.

Outcomes

Informed, confident and competent family practitioners able to support, advise and, where needed, challenge parents in their parenting and care giving role.
