

Primary Mathematics Professional Networks

2018 – 2019

Working Collaboratively to make Meaningful Changes in the Teaching and Learning of Mathematics

What is our Primary Mathematics Professional Network?

Our Networks involve three full day face-to-face sessions with one of our Mathematics Team. The sessions provide local and national updates that are specific to mathematics, whilst linking to the wider education picture. Within every network there is time to discuss and debate the Teaching of Mathematics based on the collaborative feedback of what really works in Norfolk and Suffolk classrooms. The Mathematics Team challenges the subject leaders to take relevant information back to their schools and empower them to develop their leadership role to improve the Teaching and Learning of Mathematics.

What are the benefits?

Delegate evaluations from our Summer Network 2018 highlight that the networks:

- Helps to prioritise the subject leadership responsibilities for the forthcoming months
- Gives us Local and National updates that are specific to Mathematics
- Enables the sharing of good practice for the Teaching of Mathematics
- Creates opportunities to do some Mathematics and unpick how to teach “tricky” concepts
- Explores an in depth focus for internal CPD follow up sessions
- Provides time to reflect on Mathematics within specific school context alongside action planning

What is the impact?

“Fantastic, current, specific and interesting resources, delivery and presentation.”

“Thank you, it's always fun to learn about new maths developments.”

“Thank you for all the information over this year. It has been very informative and has enabled me to be inspired by maths as previously I had always led literacy.”

“Useful once again – gives me the knowledge and 'boost' to move maths teaching in the federation forward with relevance to current 'drives'.”

99%

of delegates over all Primary Mathematics Network Meetings for 2017 to 2018 gave ratings that are good or excellent for the structure, content and delivery of the Networks.

Educator Solutions is a trading enterprise of

Norfolk
County Council

New for 2018 to 2019

Twilight Sessions

Delegates will have the opportunity to access an additional opt-in twilight. These will follow each Network series, providing vital opportunities to network further with colleagues around a shared professional development strand and to share ways of gaining greater impact in individual schools.

The second change for 2018 to 2019 is that each school attending our Network will be able to select **one** twilight from the **series of six** EEF Improving Mathematics at Key Stage 2 to Key Stage 3 Recommendations.

Autumn Network

Autumn Network Twilight

Networking and Sharing Good Practice around a focussed CPD them

EEF Twilight Sessions

1. How to Teach Learners Strategies for Solving Problems.
2. Developing the Use of Manipulatives and Representations.
3. Developing Learners Independence and Motivation to Succeed in Mathematics.

Spring Network

Spring Network Twilight

Networking and Sharing Good Practice around a focussed CPD them

EEF Twilight Sessions

4. How to Use Tasks and Resources to Challenge and Support Learners Mathematics.
5. How to Enable Learner's to make a Rich Network of Mathematical Knowledge.
6. How to Use Assessment to Build on Learner's Knowledge and Understanding.

Summer Network

Summer Network Twilight

Networking and Sharing Good Practice around a focussed CPD them
