

Mathematics Conference 2018 'Research into Practice'

Educator Solutions Mathematics Conference 2018 provides an excellent opportunity to develop your teaching of mathematics to engage and inspire young people.

Hear from our Keynote Speaker Craig Barton on
"Examples and Intelligent Practice – What I wish I knew!"

After 12 years of teaching mathematics, Craig had a bit of a revelation. By harnessing findings from Cognitive Load Theory and principles from Variation Theory, he has now completely changed his teaching, making his pupils better Mathematicians. Within his keynote he will delve into exactly what his examples and practice now look like, why he made those decisions, what the critics have to say, and how you can get involved too (if you want to, of course!).

He is the author of the best-selling book, ***How I Wish I'd Taught Maths: Lessons learned from research, conversations with experts, and 12 years of mistakes.***

- Experience a variety of workshops covering the teaching and learning of mathematics from KS1 to KS3.
- Meet a range of publishers and companies, displaying their products supporting mathematics in the classroom.
- Enjoy the unique opportunity to network with teachers from across the region, to discuss all things maths!

Phase

Primary and Secondary

Audience

All Staff

Trainer

Rose Keating
