

Promoting Best Practice across KS1 Mathematics

Are you looking for practical and easy ways to improve attainment in KS1 mathematics?

Enhance your understanding of the expectations of the KS1 tests, hear how to effectively integrate reasoning and problem-solving from our seminar leader **David Board, UEA PGCE lecturer** and attend a workshop based on developing addition and subtraction fluency within Key Stage One.

The workshop will show you how to use manipulatives and representations, to support the CPA teaching approach for addition and subtraction. You will also be shown activities which focus on building pupils' conceptual understanding and improving their calculation fluency.

By the end of the training participants will:

- know the key headline data from KS1 tests
- understand how to integrate reasoning and problem-solving into your Key Stage One mathematics lessons
- have ideas and activities to enhance addition and subtraction fluency within the classroom

Phase

Primary KS1

Audience

Primary teachers,
Subject leaders, NQTs,
Senior Leaders,
Headteachers

Trainers

Guest Speaker – David Board
Sarah Jay
