

Real-world learning experiences outside the classroom

Our trained educators lead a selection of fun, engaging, curriculum-linked sessions. These contribute towards RSPB's Wild Challenge Award and the Eco-Schools Programme. Real world learning experiences can also support school improvement needs.

Sessions available for KS1 and KS2:

Bioblitz Using binoculars, bug pots and ID guides your pupils will independently identify species adapted to the local environment. Supports understanding and enquiry of food chains, classification and biodiversity, whilst pupils have a great outdoor experience!

Habitat Explorer Working scientifically your pupils will map and score your school grounds for nature – identifying habitats that already exist and using the data to effectively contribute to a biodiversity action plan. Pupils love working as a team outdoors.

Wild Words Exploring your school grounds using all their senses, your pupils will collect natural objects and expand their vocabulary around your chosen language focus, forming, articulating, communicating and organising ideas as a stimulus for creative and effective writing.

Sessions specifically designed for the Early Years and Foundation Stage are also available
