

Raising Attainment in Reading KS2

Know what you need to change and how to make these changes have impact with this multi-stage, sustainable approach to raising attainment in reading for your Year 6 cohort.

Course Outline

By combining QLA information with focused reading comprehension training, this approach will help you identify key priorities in your school, support you to develop effectively tailored strategies and provide ongoing access to subject specialists.

With so many variables contributing to effective reading comprehension outcomes, it can be tricky to decide which element to focus on and the best actions to take to secure better outcomes for children. This programme will upskill you in the most effective strategies to teach reading comprehension, provide a detailed QLA of your Yr 6 cohort's response to end of KS2 reading tests and support you to write an action plan for impact.

The support however, doesn't end there as this programme will also give access to optional exclusive webinar follow-up support.

By the end of the course participants will:-

- be provided with a detailed Question Level Analysis performed by Norfolk LA data experts of their yr6 cohort's response to the KS2 reading tests
- receive training in the most effective strategies and approaches to teach reading comprehension
- have written an action plan identifying key priorities and selecting key teaching strategies based on the needs of their children
- Benefited from optional exclusive webinar follow-up support
