

Transformative Curriculum Design

Educator Solutions 

Equip yourself with the current thinking around effective curriculum design and transform your school's curriculum model from delivery to designing learning.

Curriculum design matters. This academic year presents the perfect opportunity to re-think your curriculum and consider how intelligent curriculum design can impact on pupil outcomes.

Join us to explore the current thinking in education around effective curriculum design and what cognitive science tells us about learning. You will have time to reflect on your own curriculum and consider your future goals whilst being provided with tools to support you along your way.

Session 1 – Knowing your curriculum design and intent:

What is the current thinking about curriculum design and how do you design an effective curriculum? Explore the models and learn the current thinking about effective curriculum design, including the progression model.

Session 2 – Knowing your curriculum design and intent:

Ensuring curriculum coherence. What is meant by curriculum coherence and how does it impact on progression and pupil outcomes?

Session 3 – Know how your curriculum is being implemented:

What do we really know about learning? What cognitive science tells us about how we learn and how this should influence your curriculum.

Session 4 – Knowing your curriculum's impact:

Ways to evaluate the impact of your curriculum on pupils' knowledge and understanding.

Session 5 – Articulating your curriculum:

Determining your vision and planning strategically to get there.

These sessions form part of a series focused on curriculum development.
