

Transformative Curriculum Design

Equip yourself with the current thinking around effective curriculum design and transform your school's curriculum model from delivery to designing learning.

Outline

Curriculum design matters.

This academic year presents the perfect opportunity to re-think your curriculum and consider how intelligent curriculum design can impact on pupil outcomes.

Join us to explore the current thinking in education around effective curriculum design and ensuring curriculum coherence, what cognitive science tells us about learning and how to successfully articulate your curriculum. You will have time to reflect on your own curriculum and consider your future goals whilst being provided with tools to support you along your way.

By the end of the session delegates will:

- Have explored the models and learn the current thinking about effective curriculum design, including the curriculum as a progression model.
- Understand what is meant by curriculum coherence and how it impacts on progression and pupil outcomes
- Be aware of what cognitive science tells us about how we learn and how this should influence your curriculum.
- Determined how to articulate your curriculum and planning strategically to secure your curriculum goals.

Ideal if you missed last term's Transformative Curriculum Design twilights, this one day session summarises the key take-away points from the series.

Phase

Primary

Audience

Curriculum Leader
Subject Leader
Headteacher
Deputy Head
Teacher

Trainer

Victoria Groom

Date

29/04/2020

Time
