to schools

### Level 3 Offers in Brief

#### **Developing A Level Pedagogy**

**Developing A Level Pedagogy to enhance the quality of teaching and the conceptual understanding of students.**

This Work Group focuses on extended professional development for experienced teachers or leaders of A level Maths teaching through the overarching themes of the new linear A level Maths specification, with changes to pedagogy in statistics teaching, assessment and expectations in the use of technology.

#### **Supporting Core Maths Work Groups**

**Supporting teachers to encourage students to continue with mathematics beyond GCSE to support other post-16 choices.**

Participants in this Work Group will be supported to increase the growth in uptake and delivery of Core Maths in schools and colleges, and to embed a culture of Core Maths within school and college Maths departments with confidence.

#### **Supporting Post-16 GCSE Resit Work Group**

**Historically, student success when re-sitting GCSE Maths is low. Class sizes are large, engagement is mixed and progress is patchy. With students compelled to re-sit until they reach 18 years old or until they achieve a Grade 4, as teachers we need to offer the best support possible.**

This Work Group focuses on supporting teachers in schools and FE colleges to enable positive outcomes for students who take the GCSE re-sit in the post-16 landscape. Participants work together, to develop strategies to improve engagement, self esteem and outcomes.
