

Using Energy

Be guided through a fully resourced lesson suitable for pupils in KS2 on renewable and non-renewable sources of energy and have time to plan for further opportunities to include energy education within the curriculum.

This half-day online webinar will equip teachers with a fully resourced pupil session on energy. The lesson has been designed so pupils learn about how energy is made and used before taking part in a craft activity.

'Using Energy!' is designed to inspire and support cross-curricular learning, giving pupils the opportunity to develop their ability to work scientifically and mathematically, analyse and evaluate as well consider renewable and non-renewable energy.

In addition to receiving the resourced lesson, teachers will also have time to plan collaboratively for opportunities to explore energy within other curriculum areas.

These free training events can be booked via the following links:

05/07/2021	09:00 - 11:00	EAEY-OM-0721-T002
07/07/2021	09:00 - 11:00	EAEY-OM-0721-T004
08/07/2021	09:00 - 11:00	EAEY-OM-0721-T003
09/07/2021	09:00 - 11:00	EAEY-OM-0721-T005

The joining instructions will be emailed to delegates shortly before the event. N.B. The link will be sent to the email address which is stored on Educator Solutions.
