

Primary Curriculum Prioritisation: One Year On with Debbie Morgan

Following on from the success of our original sessions, Angles Maths Hub is delighted to have Dr Debbie Morgan, NCETM Primary Director, returning to lead a free, online session focusing on developments within Primary Curriculum Prioritisation.

This new session focuses on the NCETM Curriculum Map and associated materials in supporting teachers and leaders to develop Teaching for Mastery approaches to mathematics across the primary phase. The session will particularly focus on 'closing the gap' and developing an inclusive curriculum for all children.

Debbie will explore the continued developments within the NCETM curriculum materials, which have evolved over the course of this academic year, in order to support with not only getting pupils back on track in mathematics, but to improve learning for all children.

This one-hour session will include time for Q & A with Debbie and the opportunity to find out how Angles Maths Hub can support you and your school with primary mathematics development.

The final opportunity to attend this online session is:

Wednesday 22nd June, 4-5pm

Please note that this session is a repeat of the sessions which took place in Spring 2 and Summer 1.

As we would like to reach as many schools as possible within the Angles Maths Hub area, we ask that schools sign up just once for the event. If you wish to join as a group, please reserve one free ticket and join the session using one device.

We warmly welcome both schools already working with Angles Maths Hub and those new to the Hub.

How to book:

To reserve your school's free place at one of the sessions, [click here](#) to visit our Eventbrite page.

Places are limited, so early booking is advisable.
