The Environment as a Stimulus for Asking Questions and Investigating Answers

Science AT1: The Environment as a Stimulus for Asking Questions and Investigating Answers

Many teachers find undertaking investigations in the environment difficult to identify and manage. A short walk through part of Wells Pinewoods will provide us with opportunities to observe, ask, predict, investigate and record real scientific questions.

Participants will:

- Gain confidence to enable them to help children tackle science investigations at KS2, using only simple equipment;
- Develop strategies to encourage children to ask questions in a form that can be investigated and recorded;
- Look at areas of the science curriculum where investigations could take place and identify a range of possible investigations for their locality;
- Consider the management issues of investigations in the environment.

Please wear suitable clothing for practical work outside and in the classroom
Refreshments will be provided.

Course Leaders: Andrew Coles (Deputy Head of Centre) and Christine Marshall (Head of Centre)

Cost: £110.00

Date	Time	Venue	Activity Ref.
3/3/2003	9.15 - 4.15	Wells Field Study Centre	2SN054
