

Get **Great** Grades

Secondary residentials for success

Maximise time outside the classroom with our exam-ready secondary school trips and courses.

Choose our excellent outdoor experiences, packed with relevant curriculum content for **geography** or **biology** and reap the benefits for your students.

"The student experience speaks for itself as do the examination results."

Whitehaven Academy,
Geography

Learning outside isn't an unnecessary add-on: It provides practical, real-life experiences: the type that children truly take on board, while feeding seamlessly into the curriculum.

Learning through Landscapes

'They come away with a better understanding of ecological techniques and this undoubtedly improves their exam results'

Bradford Academy, Biology

- > We are the fieldwork experts with an 80 year history of outdoor learning.
- > 47,000 secondary students visit us each year with $\frac{3}{4}$ of schools returning again and again.
- > Build students' confidence in their studies. Being out of the classroom helps more students to shine.
- > Options to build in adventure and other learning opportunities for broad learning outcomes.

Geography 14–16

- ✓ Complete the fieldwork requirements for **GCSE** or **National 4-5** within a range of human and physical environments.
- ✓ Students will gain transferable knowledge and skills that will prepare them for their exams.
- ✓ Access innovative and creative  fieldwork techniques and processes devised by experienced tutors and through collaboration with our strategic partners, such as the Geographical Association, and Awarding Organisations.

Biology 16–18

A Level

- ✓ Undertake a range of ecological investigations in a variety of inspiring habitats and complete relevant required practicals.
- ✓ Develop practical skills, use of apparatus and techniques, and deepen understanding of ecological syllabus content and synoptic links.

Higher and Advanced Higher

- ✓ Cover key areas from the specification, while equipping students with the skills of scientific experimentation, investigation and inquiry.
- ✓ Students can carry out a pilot study, data collection and write up an investigation for their investigative biology unit.

Geography 16–18

A Level

- ✓ Complete the fieldwork requirements for A level within physical and human environments.
- ✓ Form an independent investigation and collect data for their independent investigation, worth 20% of their final A-level marks.

Higher and Advanced Higher

- ✓ All sessions will follow the geographical inquiry process and build on students' geographical investigative skills.
- ✓ Courses will integrate key cross-curricular themes such as learning for sustainability and continue to build on the four capacities.

15% discount on bookings made before 31st December 2023. T&Cs apply.
