## Chemical Handling 1

This course will provide technicians with information on how to find the names of chemicals and locate relevant hazard information. Demonstrations and paper exercises will show how, in their work, technicians can use information in *Hazcards* on emergency procedures, storage and disposal. Two practical sessions are included to give technicians the confidence to handle glass safely and cope with emergency spills. There is also ample opportunity to ask questions on individual chemicals and other matters pertaining to chemistry.

Refreshments will be provided.  
Course Leader: John Mallott

**Cost: £70.00**
