## **Energise your school: Energy Education for Citizenship and Wise Resource**

Address issues of climate change and resource management through active citizenship. This is a practical workshop that will help you to develop a whole school approach and greater energy awareness within your school. It will support you to enhance the relevant curriculum areas, making energy management exciting for pupils. The programme includes:

- workshop sessions that will introduce fun, practical activities that will support learning
- a session on the issues behind energy management (facts/fiction)
- an energy audit/walk around with a local school (with pupil input) with ideas of how to develop opportunities for monitoring, targeting and interpretation
- opportunities for promotion and celebration

There will be an opportunity to discuss specific issues with the County Energy Adviser

Bring along...Energy and water bills from past 2-3 years if possible.

Refreshments will be provided.

Course Leader: Ann Safferey, (CREATE) Centre for Research and Training in Energy, in partnership with ACTION ENERGY and Norfolk County Council. National Energy Foundation (NEF) will also run a session on energy and drama 'GRASPING CLIMATES'.

**Cost: £115.00**
