

## **Access Through Technology**

Additional funding from Easter 2007 will allow the Access Through Technology Team - a small specialist team within Children's Services to support children within your school.

We are specialist teachers who work across the county, providing assessment, equipment, advice, support and training for children, schools and parents/carers of children who benefit from using **communication technology** to communicate and learn.

We work closely with Occupational Therapists, Speech and Language Therapists, Physiotherapists and Sensory Support Teachers in whatever combination is appropriate for the individual pupil.

The children that we support have **severe and complex communication difficulties and are currently involved with at least one health professional.**

We receive referrals from Early Years colleagues, Schools and Specialist Teams and are also alerted to children who may need our input via health colleagues.

If you think that we may be of use to you or you want to discuss a referral:  
Telephone Anna James on
