

# Tree Safety is Your Responsibility

## GROUND'S ADVISORY NEWSLETTER

### Autumn 2008

#### Norfolk County Services – Tree Policy and Inspection Service

The Ground's Advisory Service is pleased to offer the following service to enable establishments to meet their legal obligations with regard to tree safety. The service is separated into three parts:

#### Part One

- To undertake an initial site meeting with an appointed person from your establishment and an approved arboriculture consultant to determine the site specific hazards and risks in relation to trees.
- Prescribe a tree hazard risk policy suited to the size of the site and its use.
- Provide a site plan indicating priority zones groups and individual trees.
- Prescribe a tree schedule suited to the tree population detailing the tree dimensions, condition, hazards risks and potential targets.
- Provide a quotation for the surveying of the tree population.

The proposed hazard risk assessment will be carried out to 'LANTRA – Level 3 Professional Tree Inspection' standards.

The price for Part One is £470 + vat.

#### Part Two

From the above initial site visit we will provide you with a quotation for the inspection of your trees. The price for this service will vary depending on the number of trees identified, their maturity and the recommended inspection frequency.

Individual significant trees will be tagged to aid on-site identification.

#### Part Three

Parts One and Two may identify necessary works to trees. NCS will be pleased to quote for this, to obtain the necessary approvals and to oversee works.

Please contact your grounds advisor if you would like to discuss or order the services.
