## Communication Friendly Spaces

**Two day course**

**April and June 2009**

Early Years, Childcare and Extended  
Schools Services

Communication Friendly Spaces is an exciting learning and development programme which is having a huge impact on children's speaking and listening skills.

This is a two day course with practical development tasks to be completed between the two sessions. To help you put theory into practice you will be visited at work in your setting between sessions. The emphasis is on using a reflective, structured approach to establish a deeper understanding of how the physical environment impacts on children's speaking and listening skills.

**Day one** looks at theory, builds on existing good practice, has 'hands-on' practical activities and reflects on what this means for delegates in their setting.

**Day two** involves feedback from the practical development tasks, reflection, sharing impact and future planning.

**Target group:**

Early Years Foundation Stage practitioners

**Training provider:**

Elizabeth Jarman Ltd

**You must attend both sessions**

Settings interested in attending the two day course are strongly encouraged to enrol two practitioners. Settings attending the two day course will also receive a £100 bursary per setting to help support the practical development tasks.
