

Norfolk County Council in partnership with
The National Centre for Excellence in the Teaching of
Mathematics

**Planning and Teaching
Mathematics
in a Mixed-Age Class**
Another County's View

**Tuesday 31st March 2009
4.30-6.30pm**

Norwich Professional Development Centre
Refreshments will be available from 4pm

The National Centre for Excellence in the Teaching of Mathematics provides effective strategic leadership for mathematics-specific CPD. It aims to raise the professional status of all those engaged in the teaching of mathematics so that the mathematical potential of learners will be fully realised.

Fiona Jeffrey, an Education Consultant from Devon, will lead a workshop including ideas about the ways in which planning might be approached, the sort of resources that can be used and how to deal with a rolling programme if cross-curricular work is completed with a mixed-age class.

Places on this session are free of charge. Please note, that as this is a twilight meeting, supply cover funding is not available.

**Places can be booked online www.cpd.norfolk.gov.uk/sdms/
